METAPHYSICS.

If the mind could be laid on a table and cut up, the anatomy of a dead man might be the same as that of an animal, or as that of a fish; but if we were to examine the vegetable kingdom, it would be found that there are many differences between the different classes of plants.

The state of the vegetation of the earth is in a constant state of change and improvement, and it is this change and improvement that is the foundation of all the different classes of plants.

R E P O R T

The New York Times has published a report of the press in Philadelphia and New York, for the purpose of collecting money for the relief of Central American sufferers by the fire in Charleston. We hear that thirty thousand dollars had been collected in New York, when the latest account left that city, and the sum was then rapidly increasing.

F O R S A M E

A firm of gentlemen, in the capacity of carpenters' stockists, have published a letter in the Boston "American" on the subject of their efforts to provide relief for the sufferers in Charleston, and they have made arrangements to collect money for the purpose. The letter was signed by the names of the firm, and it was printed in large type.

MOSE OF PETER SINGH

In addition to the political columns which every "American" is sure to read, there is one in which the following letter is published:

"Dear Sir:—I send you a copy of my speech before the New York Stock Exchange, and I hope you will find it interesting. I am, however, in a hurry, and cannot write more. I will be in Philadelphia in a few days, and will then call on you. Yours truly,

PETER SINGH."
